David: While we are still reviewing ACHD's annual monitoring network plan, we looked at the South Fayette PM10 monitor and determined that the sampler shutdown is approvable—we checked with our planning group and they concurred. Final RA approval of ACHD's plan will most likely happen in October, but we wanted to let you know about the PM10 monitor as it would be helpful as part of ACHD's new NATTS site.

Hi Alice,

I have reviewed Allegheny County's 2021 annual network plan with regards to the shut down of the PM 10 monitor located at the South Fayette monitoring station (AQS ID: 42-003-0067). This sampler shut down is approvable as it meets the system modification requirement stated in 40 CFR §58.14(c)(1) and is not in an Allegheny County PM10 maintenance area. The entirety of Allegheny County's 2021 annual network plan is still under review. Please let me know if you need any further information.

Lori
